PROFESSIONAL SUMMARY

Final-year Computer Science and Engineering undergraduate at VIT Vellore (CGPA: 9.13/10) with a strong foundation in Data Structures, Algorithms, SQL, and full-stack development. Hands-on experience in building backend and full-stack applications, developing REST APIs, working with databases, and integrating AI-powered solutions. Strong problem-solving skills with an interest in software engineering, technology, backend development, and emerging technologies, seeking opportunities to apply technical knowledge, build impactful solutions, and grow as a professional.

EDUCATION

Vellore Institute of Technology (VIT) — Vellore, Tamil Nadu | 2023 – 2027
B.Tech in Computer Science and Engineering — **CGPA: 9.13 / 10**

Sri Shirdi Sai Junior College — Rajahmundry, Andhra Pradesh | 2021 – 2023
Intermediate (CBSE, Class XII) — **Percentage: 86.2%**

Sri Shirdi Sai Vidyanikethan — Rajahmundry, Andhra Pradesh | 2020 – 2021
Secondary School (Board of Secondary Education AP, Class X) — **Percentage: 95.0%**

TECHNICAL SKILLS

- **Languages:** Java, SQL
- **Web development**: HTML,CSS,JavaScript
- **Backend & Databases:** Node.js, Express.js, RESTful APIs, MongoDB, MySQL
- **Core Competencies:** Data Structures & Algorithms (DSA), OOP, Operating Systems (OS), DBMS

PROJECTS

StaySpace – Vacation Rental Platform

Node.js, Express.js, MongoDB, EJS, Cloudinary, Gemini API, Leaflet, Passport.js

- Developed a full-stack vacation rental platform where users can explore, create, update, and manage property listings through a responsive web interface.
- Implemented secure authentication and role-based authorization using Passport.js, ensuring only authorized users can modify their own listings and reviews.
- Designed APIs and integrated MongoDB to support complete CRUD operations for property listings and customer reviews.
- Integrated Cloudinary for image storage and Leaflet Maps to display property locations interactively.
- Built an AI-powered review summarization feature using the Google Gemini API to generate concise summaries of customer feedback.
- Applied the MVC architecture to improve maintainability and scalability.

Banking Transaction & Ledger Backend

Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt, Nodemailer, REST APIs

- Built a robust banking backend system using Node.js and Express.js, providing RESTful APIs for user onboarding, account management, and financial workflows.
- Enforced enterprise-grade security with JWT-based authentication, bcrypt password hashing, protected middleware routes, and real-time account status checks.
- Designed comprehensive transaction and ledger models to handle atomic credit/debit records, featuring idempotency validation to strictly prevent duplicate transactions.
- Constructed high-performance balance retrieval queries via MongoDB aggregation pipelines and integrated Nodemailer for automated transaction alerts and registration receipts.

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Generative AI Professional

Oracle | 2025

- Explored OCI Generative AI services for developing AI-powered solutions.
- Gained hands-on exposure to deploying and working with Generative AI capabilities on Oracle Cloud Infrastructure.
